resources.1. Field of the Invention

The present invention relates to an apparatus and method for processing sheets. More particularly, the present invention relates to an apparatus and method for processing sheets such as

banknotes, securities, or the like, in a processing tank, on the basis of information obtained from an image sensor, and then feeding the processed sheets to a stacker and a device for stacking the processed sheets, respectively. 2. Description of the Prior Art Generally, in the prior art, since a stacker and a device for stacking the sheets are provided separately from each other, and the sheets fed from a processing tank are stacked by the stacker and then fed to the device

for stacking the sheets, it is necessary to provide for each one of the stacker and the device for stacking sheets a specific apparatus, making it disadvantageous in terms of equipment cost
