Among the vast backlog of spam that can make up your inbox, you will find carefully tailored messages that seem designed to capture your attention. One of the most tempting is an email entitled "Introducing a special offer for International Students at [school name] University." Gone are the days when email scams involved a message that claimed to be from your local school inviting you to a new, online course or program. Today's scams can be more subtle and appear to be real. In a 2018 marketing scam study conducted by the Online Trust Alliance, 45% of respondents reported experiencing a campaign-related email scam in the previous year. There are two types of phishing emails — exploit and lock-in. Exploit phishing attempts to steal your credentials to get into your bank account, while lock-in scams attempt to get your bank information to commit identity fraud. A lock-in scam targets people who visit a website on a regular basis. For example, email customers of banks and financial institutions to trick them into providing personal information and passwords for online banking and other services. "The key to locking-in phishing is that it involves repeated emails with an attachment. This means that the offender has to invest a lot of time and effort to contact the victim repeatedly," says Jessica Hill, CSO at the Online Trust Alliance. While the best way to prevent exploitation is to not give out your personal information or financial details, there are steps you can take to protect yourself from lock-in scams. 1. Know the signs It doesn't sound too difficult. But experts warn that lock-in schemes can be very convincing. They carefully target groups that don't usually respond to spam emails. And often they are packaged to look

KEYMACRO is an application that lets you replace your keyboard's pre-programmed keys with your own, custom-built shortcuts. This application is designed to be easy to use and as versatile as possible. The developers have designed the interface for those who are more used to using Windows and Linux. This application's design is intuitive, and will have you up and running in no time. Once you set up your keyboard you will wonder how you ever lived without it! Keyboard Replacement Utility: If you are tired of the boring keyboard that comes with your computer, or if you've got a Logitech "one-button" keyboard that you just can't stand, this is the application for you! KEYMACRO can replace the pre-programmed keys on any keyboard with your own custom-made set of keys that you can create using the Keyboard Editor utility. Keyboard Editing Utility: Keyboard Editing utility allows you to design your own custom-made keys for the KeysMacro application. You can use any key from your keyboard, or even one of the modifier keys (Command, Alt, Shift, Ctrl or Win), and use it as you see fit. Keyboard Editor: The Keyboard Editor allows you to specify the key you want to use as a modifier key (Cmd, Alt, Shift, Ctrl or Win) and use it as a regular key. It also allows you to specify the KeyMacro's key name (used in the KeysMacro's shortcut), which will allow you to give your keyboard a custom-made set of keys. Requirements: This is a Windows application, and is Windows-only. Smugmug Uploader - Web Uploader - Online Gallery Software - SmugMug Smugmug Uploader is an easy-to-use program that fits the bill, as it can upload files from one or more folders automatically. It can even monitor these directories and send any new images or videos directly to your SmugMug account without requiring additional user input. Novice-friendly software utility that can be configured in minutes When launching the application for the first time, you will be required to log in with your Google or Facebook account, and then provide your SmugMug credentials. After granting the necessary permissions, you can move to the next step. When backing up files with the help of Smugmug Uploader, you do not need to load the images or videos directly, but rather to select the folders they are located in. The application detects files saved to supported formats and processes them automatically. Nifty program that monitors your folders and creates online galleries Once you have selected all the directories that should be tracked, you can minimize the application to the system tray and do whatever you like while your files are uploaded. If your images and videos are stored in multiple directories, the program creates galleries based on each folder's name when uploading them to SmugMug. When new files are added in the monitored locations, Smugmug Uploader detects and sends them to the cloud automatically, so it is safe to say that it may never be necessary to bring up the application window again after performing the initial configurations. Well-designed, straightforward software solution for SmugMug users On the whole, Smugmug Uploader is a great utility for users who need to upload numerous videos or videos to SmugMug. It is very easy to configure, and it is even capable of monitoring certain folders on your hard drive and sending new files to the cloud automatically. Smugmug Uploader can be used on the following operating systems: Windows, Mac, Linux. Smugmug Uploader has been tested on the following browsers: Internet Explorer, Google Chrome, Mozilla Firefox, Opera, Safari. You can find and download Smugmug Uploader on MediaFire.com free of charge. No matter how good your code is, once it's on the web, you'll never stop the relentless onslaught of hackers who want to exploit it. But you can protect your apps from hacking attacks, by enabling the App Transport Security (ATS) feature. ATS ensures that third-party code included within your app is either safe to use or safely discarded. Here's how to enable ATS. Step 1. Select the "On" option First, you need to check whether you already have ATS enabled. The reason you want to check this is because the process of enabling ATS may
